

SLIDE[®]

modular sign system

SLIDE is the most diverse modular signage system on the market. Precisely engineered componentry consisting of structural rail, inserts, and end caps offers endless functional and aesthetic design solutions. Information can be updated, signs can be expanded, and inserts can be rearranged. Superior design blended with precision engineering equals a modular signage system that leads the industry.

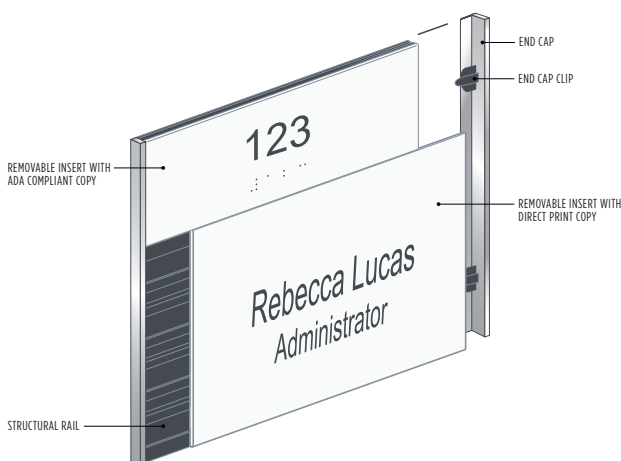

Select from seven end cap styles in satin natural anodized aluminum or painted finishes to secure graphic inserts to the structural rail.

// SLIDE®

ENGINEERED FOR SUSTAINABILITY.

In 1978, we introduced System 2/90 Modular, a sign system that revolutionized the industry by adapting to ever-changing environments. Our longevity speaks to the engineering quality and value of what is known today as our SLIDE Modular Sign System.

SLIDE is a flat panel sign system consisting of a structural rail with removable sliding graphic inserts secured by end caps. When the message changes, simply remove the end cap to replace the graphic insert for a sustainable and economical solution that stands the test of time. The modular design and extensive options of SLIDE's three basic components allow for a near-infinite variety of sizes, finishes, and configurations. When people change, departments move, and brands evolve, our signs do too. Join a legacy of excellence with SLIDE, where tradition meets innovation to deliver lasting impact and performance for all your signage needs.

HIGHLIGHTS

- Basic components: Structural Rail, Graphic Inserts, and End Caps.
- Structural rails are black extruded aluminum and a minimum of 2" high by a maximum of 90" wide.
- Three profiles: Thin (9/32"), Standard (9/16"), and Box (2 or 3 1/4").
- Inserts are painted ABS-plastic, aluminum, woodgrain or stone laminates, and aluminum carriers with paper and protective lens.
- The black carrier is available in satin natural or painted finish.
- Inserts are side-loading and secured by removable end caps.
- Tamper-resistant end caps are available.
- Choose from seven end cap styles in painted or satin natural anodized aluminum finish. Satin natural finish is not available for 2" Slimline and Round Corner end caps.
- Trim and Accent Strip options can enhance sign aesthetics.
- Sign price includes 17 mounting options for workstation panels, walls, and ceilings.
- Plaques Plus serves as a cost-effective, non-changeable solution where inserts are permanently attached to a plaque.
