

ELEVATION^{PLUS}

logiflex

Main characteristics

2 or 3 motors

It's fast, powerful and silent, with a synchronized multi motor system and collision detection.

Complete collection including L-shaped tables

The collection offers 2 surface depths (23" or 29") for rectangular or L-shaped tables, while modules can be added to create executive desks.

Power beam

The organization of the electric cables is made aesthetic by the power beam. A fabric sleeve organized cords from the power beam to the surface and can be finished according to the customer's choice.

Compatible products

Tables are available in all Logiflex colors for a harmonized layout. Two categories of Level and Volt storage fit under the table: low pedestals and MOBC mobile pedestals. Level divider screens and modesties can also be added to the table.

Details

Technical specifications

Telescopic 3 section T-legs, on levelers.
Adjustment range: 24½"H to 50"H
Operation speed : 1.25" per second.
One motor per leg.
Sound level: less than 42dB.

ELEVATION^{PLUS}

Elevation Plus is the ergonomic solution for flexible, comfortable work. It's fast, powerful and silent, with a synchronized multi motor system and collision detection.

Each surface is equipped with an electrical control panel and can be raised or lowered between seated and standing positions in a matter of seconds.

Elevation Plus allows the user to assume the posture they prefer, depending on the task at hand, their energy level or their mood.

The result? A healthier, more productive work environment.
