

UNIFY COLLECTION

The UNIFY collection is a multi-use furniture series which allows for the creation of mixed-use space.

With one collection, UNIFY offers the ability to create open, semi-private, or focused based configurations which can integrate seamlessly with other OFGO STUDIO product offerings.

Influenced by the future generation of workers, UNIFY promotes environments for self-expression and rapid-fire collaboration.

Apily named, **UNIFY** offers a collection of modular units that encourage unity and collaboration. Modular units are available in straight or curved modules, and are offered in three back heights for varying levels of privacy – 32.5", 47", and 53".

An integrated shelf feature provides an additional workspace surface to create a dynamic collaborative space while maximizing floor real estate.

Additional options include a rotating tablet with a 360 degree turning radius as well as a multitude of integrated power module positioning options that allow users to unwind and recharge.

Linking middle extension units connect between two modular sofas to turn an open space into an enclosed privacy booth. Like a room within a room, create a comfortable space that can incorporate a surface as well as power and wire management. In addition, raised headrest options allow for visual and acoustical effects.

FLEXIBLE. AGILE. DYNAMIC.

The freedom to reconfigure as needs and preferences change creates a dynamic and fresh space. UNIFY offers a comprehensive line of modular lounge seating, benches, and occasional tables that can conform to the needs of a multitude of environments. Individual spaces seamlessly integrate with larger collaborative configurations, facilitating both concentrated personal work and collaborative team work.
